PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 3+ years of experience designing, developing, and deploying high-performance web applications and backend microservices. Proficient in C#, ASP.NET Core, Python/Django, and Angular. Proven track record in architecting event-driven systems using Apache Kafka, Redis, and Clean Architecture. Adept at API security, database optimization, CI/CD pipelines, and leveraging AI-assisted engineering tools to accelerate development cycles and deliver production-ready code.

TECHNICAL SKILLS

Backend Development:	C#, ASP.NET Core, ASP.NET MVC, RESTful APIs, Python, Django, Django REST Framework
Frontend Development:	Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design
Architecture & Design:	Microservices, Clean Architecture, CQRS, SOLID Principles, OOP, Design Patterns, YARP Gateway
Databases & Messaging:	SQL Server, PostgreSQL, Entity Framework Core, Redis Caching, Apache Kafka, SignalR, Celery
DevOps, Security & Tools:	Docker, Docker Compose, Git, GitLab CI/CD, JWT, RBAC, xUnit, Serilog, Nginx, Cursor, Claude

PROFESSIONAL EXPERIENCE

Full Stack .NET Developer | GoGetOffer

Nov 2023 – May 2026

Cairo, Egypt

- Engineered scalable microservices and backend systems using C#, ASP.NET Core, and Clean Architecture for an enterprise platform comprising 12+ core microservices.
- Configured and deployed an enterprise API Gateway utilizing YARP, optimizing request routing, rate limiting, and backend authorization flow.
- Reduced system latency and enabled real-time features using Redis caching, SignalR, and event-driven asynchronous messaging via Apache Kafka.
- Applied CQRS with MediatR, FluentValidation, AutoMapper, and Repository Pattern to build modular, testable, and highly maintainable codebases.
- Built reactive frontend features with Angular and TypeScript, integrating seamless RESTful APIs and enhancing application performance.
- Containerized microservices using Docker and integrated automated build/deployment workflows via GitLab CI/CD pipelines.
- Coordinated team development tasks, conducted technical code reviews, and contributed to key system architecture decisions.

KEY PROJECTS

Platinumail — Production Email Platform | platinumail.com

Full Stack & DevOps

- Architected and deployed a full-stack production email platform using Angular, Python/Django, PostgreSQL, and Docker Compose on an Ubuntu VPS.
- Integrated Stalwart mail server with Nginx reverse proxy, configuring complete SPF, DKIM, and DMARC settings for optimal email deliverability.
- Implemented mailbox management, custom domain configuration, SMTP/IMAP communications, and automated recovery flows.

Ticket Booking Platform | Modular Monolith (.NET Core & Angular)

Full Stack Developer
